Panel Pop Up Displays
Easy Set Up Instruction
### (Please read before set up)

http://www.prints-mart.com

1. Open the Frame - Remove the frame from the transport case. Place the frame on the floor with brackets and the group of metal pins at the top. Expand the frame. Pull upwards on the frame and self-lock in the expanded position.

2. Attach the Channel Bars - Attach the channel bars vertically to the front of the frame. Also attached the channel bars on the back of the left and right ended. (How to install the channel bars? Insert the pointed end into the slot of the bottom part of each hub. Slide the flat end into the upper part of each hub.)

3. Attach the Graphic Panels - Start at one end and work your way across the frame. The panel has a slot at the top that slides onto the pin at the top of the frame. Once both sides are attached to the pins, work your way down slightly and slowly, aligning the magnetic strips on the back of each panel. Repeat the steps to other graphic panels. Hang up the spotlights to the top and ready to go!
